

WATER: WILL I EVER SEE THAT GLASS OF WATER AGAIN?

water body 	A physical feature formed by water: river, lake, stream, reservoir, ocean etc.
transportation 	The movement of water through the atmosphere sometimes visible as clouds blown by winds.
transpiration 	Evaporation of water from leaves of plants.
water treatment 	Any process that improves the quality of water to make it more acceptable for an end use.
sewer 	An underground method for carrying off drainage water and waste matter.
sewage 	Waste water and excrement.
drain 	A channel or pipe carrying off surplus liquid especially rainwater.
gutter 	A narrow trough fixed beneath the edge of a roof to carry off rainwater.

Where does it come from?
 Where is it stored?
 How does it get here?

What can we do to conserve it?
 How can we prevent water poverty?

water stress 	When the water resources do not meet the demands of the population.
water scarcity  <p>Rainfall Soil dryness Water shortage</p> <p>What does this slide tell you? Even though lots of rain falls and the land is not too dry, there is a water shortage. Why?</p>	Lack of fresh water to meet water demand, this may be for a variety of reasons: physical, environmental and economical.
United Nations 	An International organisation formed to discuss and solve global issues.
SDG 	Sustainable Development Goal – the targets of the United Nations.
NGO 	Non-governmental organisation – charitable organisations often formed to help achieve SDGs.
